Our Company & Product

Established 1970 Dunn & Farrugia are committed to providing our customers the highest standard of product and service. For your home a stylish, secure and safe fence to meet any landscape application.

Unlike traditional timber picket fences **Dunn & Farrugia's Steel Picket Fence** manufactured from pregal then powdercoated or coated *DuraBond®* for marine

environments is designed to withstand the toughest conditions, never needing paintbrush application, just a periodical wash down to maintain finish.

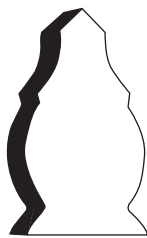

Won't rot, warp, or deteriorate as timber picket fences can. Pickets can either be face welded or punched through the rail for a stronger, stylish construction if ever hit or vandalised. A traditional look that lasts.
